

ICPC Workshop T3 W1

Introduction + Problems

Angus Ritossa and Isaiah Iliffe

This Workshop - run by UNSW CPMSoc

- We will start at 5 past to allow people to join!!
- Make sure to join our discord: <https://discord.gg/UgAQqc8E> or scan the QR code

- Schedule
 - 1 What is ICPC?
 - 1 Basic overview
 - 2 Contest dates
 - 3 How to register
 - 2 Look at past problems

International Collegiate Programming Contest (ICPC)

International Collegiate Programming Contest (ICPC)

- Competitive programming (more on that later) competition

International Collegiate Programming Contest (ICPC)

- Competitive programming (more on that later) competition
- Team of up to three people, with one computer

International Collegiate Programming Contest (ICPC)

- Competitive programming (more on that later) competition
- Team of up to three people, with one computer
- 5 hour competitions (generally)

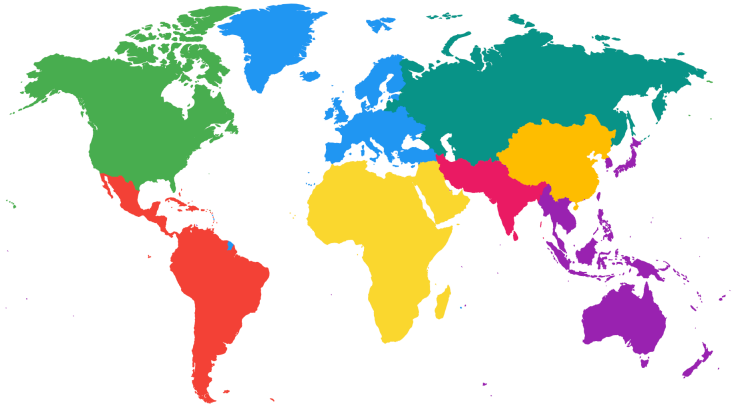

International Collegiate Programming Contest (ICPC)

International Collegiate Programming Contest (ICPC)

- ICPC is broken into regions

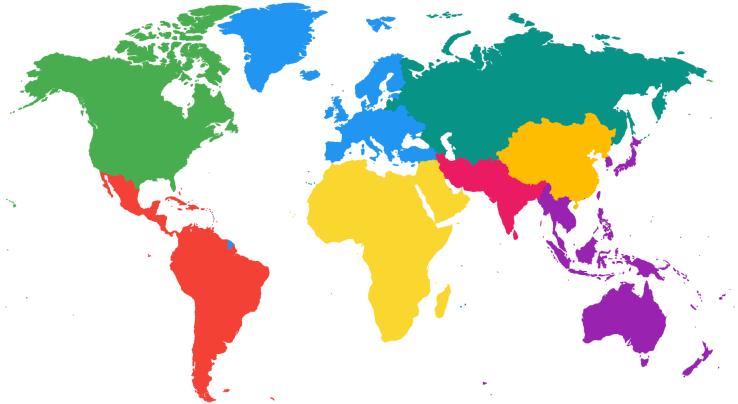

International Collegiate Programming Contest (ICPC)

- ICPC is broken into regions

International Collegiate Programming Contest (ICPC)

- ICPC is broken into regions

- We are in the Asia Pacific region, and within that the South Pacific region (with NZ and Fiji)

Uni Courses

Uni Courses

- COMP1511 (or equivalent) is essential!

Uni Courses

- COMP1511 (or equivalent) is essential!
- COMP2521 (Data Structures and Algorithms) is useful

Uni Courses

- COMP1511 (or equivalent) is essential!
- COMP2521 (Data Structures and Algorithms) is useful
- COMP3121/3821 (Algorithms and Programming Techniques) is useful for some harder problems

Uni Courses

- COMP1511 (or equivalent) is essential!
- COMP2521 (Data Structures and Algorithms) is useful
- COMP3121/3821 (Algorithms and Programming Techniques) is useful for some harder problems
- If you enjoy competitive programming, we recommend taking COMP4128 (Programming Challenges)

Uni Courses

- COMP1511 (or equivalent) is essential!
- COMP2521 (Data Structures and Algorithms) is useful
- COMP3121/3821 (Algorithms and Programming Techniques) is useful for some harder problems
- If you enjoy competitive programming, we recommend taking COMP4128 (Programming Challenges)
- We will explain new algorithms/techniques when they are encountered - so don't worry if you haven't done many courses!
